Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Portein of the histidine-rich

protein of the malaria parasite Plasmodium lophurae.";

Nature 312:616-620(1984).

-! MSCELLANBOUS: IN THE INTRAERYTHROCYTIC STAGES OF DEVELOPMENT OF

P.LOPHURAE IN DUCKS, THERE IS A SYNTHESIS OF A MAJOR PROTEIN THAT

ACCUMULATES TO COMPRISE AT LEAST 50% OF THE CELLULAR MASS: THE

HISTIDINE RICH PROTEIN.

Biol. Chem. 274:2665-2671 (1999).

-: FUNCTION: TRANSCRIPTIONAL ACTIVATOR. ACTIVATES THE TRANSCRIPTION OF A NUMBER OF LIVER GENES SUCH AS HNF3B.

-: SUBCELLULAR LOCATION: Nuclear.
-: SIMILARITY: BELONGS TO THE CUT HOMEOBOX FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            16-OCT-2001 (Rel. 40, Last sequence update)

SUBCELLULAR LOCATION: Nuclear (By similarity).

DEVELOPMENTAL STAGE: REQUIRED DURING THE ENTIRE LARVAL PERIOD FOR NORMAL ADULT DEVELOPMENT. IT IS FOUND IN ALMOST ALL CELLS AND ITSJUES TROUGHOUT GASTRULATION AND ORRANGENESIS THOUGH AT A MUCH LOWER LEVEL THAN IN BARLY SYNCYTIAL STAGES.

SIMILARITY: Contains 1 chromo domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps
